

How to Print the Stickers

- 1. Buy sticker paper.** Craft or office supply stores sell paper that has adhesive on one side. It's usually lined with a paper backing that you can peel off when you're ready to use the sticker. Buy paper that fits the specifications of your printer.
- 2. Adjust the sticker size to your liking.** Use the sticker template as a start. You're only limited by the size of the paper - if you want, you could make an 8 1/2" by 11" sticker!
- 3. Cut out the stickers.** Use scissors to cut out the design you printed. If you're printing more than one design, space them at least 1/8 an inch apart to prevent cutting accidents.
